Personal story	<p>Prepared by Richard Preiss</p> <p>I became aware of DOME through an advertisement in the Murray Valley Standard newspaper. I enquired and found as well as assisting the mature age to find employment, training was available to me. I was informed of the DOME training courses available and encouraged to participate. As I was qualified to participate I applied and was successful in completing Certificate 1 in IT.</p>
Personal story continued..	The course was very informative and interesting. I learnt new skills and gained confidence in using the

	<p>software. Peter MacCulloch from DOME visited the training centre to monitor if the training was meeting my requirements.</p> <p>The instructor was easy to understand and able to answer questions at a higher level than the course permitted. I was very happy with the training and the assistance available.</p> <p>During the course I obtained permanent casual work. It has been a positive experience dealing with DOME and associated staff and I would be more than happy to promote its services to respective employees and employers in the future.</p> <p>Richard Preiss</p>
Testimonials / quotes from participant(s)	As above.
